Precision Construction Services, LLC

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS
NAVFAC · USACE · GSA · PRIVATE CONSTRUCTION

INTRODUCING · PATENT PENDING

Zhēn™

The Quality Control Systems Guardian

CMMC-READY Built to work inside your CMMC Level 2 boundary — on Anthropic's AI for government, authorized at FedRAMP High and DoD IL4/5 in AWS GovCloud. Your project stays on your own server.

Construction QC just got a guardian. Zhēn reads the contract, registers every requirement, and keeps the whole job in one true record — so your people spend the day building, not chasing paper.

Every requirement registered. Every record true.

Zhēn Federal — NAVFAC · USACE · GSA

Zhēn Private — commercial · residential · industrial

From the contract to the day the job closes

Reviewed before the bid

She reads the solicitation, specs and drawings together and writes a full constructability review — missing sections, bad callouts, code conflicts — so questions become RFIs before the bid, not change orders after.

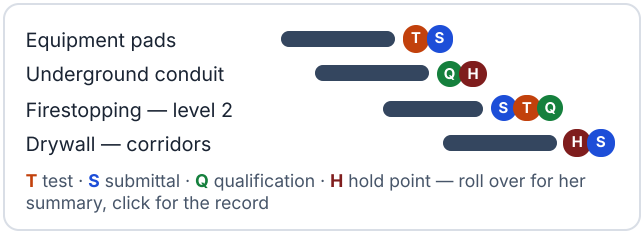

The job's paperwork, built

Submittal register, testing plan and Test Map, three-phase plan and hold points, QC and safety plans — and a live Blue Folder for every feature of work.

Three reports, one record

The Superintendent, QC Manager and Safety Officer each write their part of one day. Snap the test ticket and the record fills itself. Signed by the right people, in the Government's format.

Every QC item, on the schedule

Ask her out loud — like Siri

YOU
"Zhēn, find me all the emails about the elevator controller."

ZHĒN
Here are 6 — the latest is the ship date. I've opened them in the Project Inbox.

YOU
"Bring up the approved submittal for 07 84 00."

Scan to meet Zhēn — watch what she can do.

Zhēn™

THE QUALITY CONTROL SYSTEMS GUARDIAN

Precision Construction Services, LLC

She fits your company — not the other way around

- **Your file structure.** Zhēn matches your existing folders and works from your files where they live — nothing copied, nothing filed twice. She asks before adding a folder.
- **Your templates and forms.** She customizes herself to your business practice: your forms, your logo and colors, and the way each person on your team works.
- **Everyone, their own view — on any device.** Subcontractors, owners and the Government sign in on a phone, tablet or laptop and see only their part.
- **CMMC-ready by design.** She works with Anthropic's AI for government, authorized at FedRAMP High and DoD IL4/5 in AWS GovCloud. Your project stays on your own server.

Everything else she does

Runs the meeting

Writes the agenda from the live job, records it with live captions, drafts the minutes, and each person confirms their part. Toolbox talks too.

Project Inbox

Her view of your Outlook, sorted by issue — submittals, RFIs, safety, changes. Your inbox does not change. She drafts; you send.

Change requests

Researches every record on the job and writes the PM's position: a defense, a compromise, and a way forward.

Ties schedule and cost to the field

Daily progress, fragnets, time-impact drafts, changes and pay estimates come straight from the field record.

Thinks like a senior CM

Leads with the answer, cites the governing document, and flags anything that would bounce at review.

Takes over a running job

Up to date and under control in 30 days, with a recovery plan and a Success Guide for every position.

One badge, one scan

A safety orientation built from this job, then a badge printed on site with only verified training and each person's own QR sign-in.

Training that keeps morale up

A private 12-month program for every person. Progress goes to them first — they choose whether to share it.

Nothing lost

The junk scanner reads a delivery ticket, receipt or sticky note and files it. Optional GPS units keep an eye on the equipment.

ZHĒN FEDERAL

Quality control for NAVFAC, USACE and GSA work

Runs the Contractor Quality Control program the contract requires — three-phase control, EM 385-1-1 safety, daily reports in the Government's format — and holds every gate until the work complies.

ZHĒN PRIVATE

Site control for private construction

Runs the whole site — permits and city inspections, owner contracts and subcontracts, pay applications and lien waivers. No waiver, no payment.

Built by a QC Manager. James P. Franks, CCM, CQM-C — 28 years in construction management, 18 on federal contracts; Marine Corps veteran. Precision Construction Services, LLC is service-disabled veteran-owned.
